

Good morning Nick,

I have included Don on this email, so he can add these requests to the agenda.

I'm requesting to purchase 19 new pagers for a total cost of \$6,817.20.

I am also looking to purchase 3 standpipe kits. These connect hoses inside high-rise buildings using the standpipe. The total for 3 is \$5,400.

Also in light of the most recent events at 1 Broadway, we realized we lack supplies for any type of water emergency. I have included a cart printout that lists 8 life safety vests. Any member on the shoreline during a rescue operation should wear these. That total is \$1,217.76 and will equip the 2 main apparatus that would respond with proper equipment.

While at 35 Broadway there was a power supply issue in the apartment and I am also looking to purchase 1 battery operated fan. This fan runs on Makita batteries which we already have a supply of for our power tools. The cost of this fan is \$5,471.85

Also my chief's vehicle has a few malfunctioning lights. I contacted Auto Solutions to upgrade those lights and add additional lighting to the rear of my vehicle for \$6,260.

The purchase of these items would come out of my Equipment budget which currently has over \$46,000 left and would leave me with enough to cover necessary cost for the next couple months before the fiscal year ends.
