

Troy Menands Bridge PEL Public Meeting

The New York State Department of Transportation (NYSDOT) is studying a possible rehabilitation or replacement of the Troy Menands Bridge over the Hudson River. We are assessing the existing conditions of the study area – the Troy Menands Bridge carrying NY Route 378 over the Hudson, I-787 and NY Route 32 (Broadway) and the nearby local roads in South Troy and Menands. Past efforts on the eastern side of the corridor have recommended three bridge connection concepts.

- ▶ The purpose of this meeting is to discuss the study findings and gather feedback from the Village of Menands and public at large. Comments and input from this meeting will inform future National Environmental Policy Act (NEPA) documents.
- ▶ **Please note that this is an in-person meeting.** A recording of the meeting will be uploaded to the study website for those who are unable to attend.

The focus of this meeting will be the western segment of the NY Route 378 corridor from I-787 to NY Route 377 (Van Rensselaer Blvd), creating a direct bicycle/pedestrian connection between Menands and South Troy and reconfiguring the NY Route 378 and NY Route 32 (Broadway) interchange and ramps.
