**RE: Notice of Project in Design Development
PIN 1811.17 Traffic Signal Rebuild SFY 26**

Dear Mr. Hagmann;

The Department is pleased to inform you that NYSDOT Region 1 is progressing the design of a project in which intersection of Route 32 Broadway and the NY 378 WB off ramp in Menands will have a Traffic Signal built; replacing the existing Traffic Signal. It is anticipated that the project construction will be completed in 2026 or 2027.

We do not expect construction to have a significant impact on operations at the intersection.

It is our hope that providing you this advance notice will allow sufficient time before work begins to resolve any concerns you may have regarding the project or the planned traffic control strategy. Toward this end, I ask that you contact me with any questions or comments regarding this project:

Richard Filkins, Project Manager
